By making transparent blocks, X-ray packages also allow players to locate monsters and other players. Some players believe that using X-ray packages in this way is unfairConsequently, many servers have banned X -ray resources packages in an attempt to level the playing field. While it is difficult to understand if a player is using X -ray packages, the rescue registers of a server can detect if a player is using any modification, tracing the mining extraction models. Through these models and indicators, players who use X -ray packages can be identified and prohibited by the game. Thanks for letting us know! Tell us why! Why!
